

AI FOR

Everyday Business

Practical productivity for leaders and professionals

Emails • Documents • Data • Presentations • Planning • Meetings

NON-TECHNICAL COURSE

Course deck • 12-15 hours

The course promise

Use AI to improve work—not to surrender judgment.

01

SAVE TIME

Draft, summarize, classify and organize routine work faster.

02

IMPROVE QUALITY

Communicate clearly, analyze information and develop stronger first drafts.

03

WORK RESPONSIBLY

Protect information, verify important outputs and keep people accountable.

Designed for executives, managers, team leaders and employees—no coding required.

What participants will be able to do

- Choose the right AI tool for a business task
- Write clear, reusable prompts
- Handle email and documents efficiently
- Analyze spreadsheets in natural language
- Create stronger presentations
- Build weekly plans and meeting workflows
- Research and verify information
- Use AI safely within company policy

Outcome: a repeatable AI-assisted workflow for each participant's real job.

Recommended learning format

12-15 hours • flexible delivery

Delivery options: 6 weekly sessions • 10 self-paced modules • 2-day workshop • 4-hour executive edition

Ten modules—from curiosity to capability

01

AI at work

02

Prompting

03

Email

04

Documents

05

Data & Excel

06

Presentations

07

**Weekly
planning**

08

Meetings

09

**Business
roles**

10

**Responsible
AI**

CAPSTONE

Redesign one real workflow

Know where AI helps—and where it fails

AI IS STRONG AT

- Drafting and rewriting
- Summarizing and classifying
- Comparing options
- Brainstorming and structuring
- Analyzing structured data

AI NEEDS HUMAN CONTROL

- Factual accuracy
- Missing business context
- High-stakes decisions
- Current or authoritative information
- Ethical and legal accountability

CRAFT a better business prompt

Five ingredients turn a vague request into usable work.

CONTEXT

What is the situation?

ROLE

What expertise is useful?

ACTION

What must AI do?

FORMAT

How should it respond?

TESTS

What must be true?

Tip: ask AI to identify missing information before it writes the final answer.

From vague request to reliable instruction

WEAK

“Summarize this meeting.”

PRACTICE

Rewrite three weak prompts using CRAFT.

CRAFTED

You are an executive assistant. Using only the meeting notes provided, prepare a concise management summary. Include decisions, action items, owners, deadlines and unresolved issues. Present actions in a table. Clearly mark missing owners or dates; do not invent them.

Turn the inbox into decisions and actions

SUMMARIZE

Long threads → five key points

DRAFT

New messages and replies

ADAPT

Formal, friendly, firm or diplomatic

EXTRACT

Decisions, owners and deadlines

FOLLOW UP

Reminders and meeting invitations

CHECK

Facts, recipients, tone and attachments

Lab: tame a 15-message project thread

- 1 Produce a five-line summary**
- 2 Extract decisions and commitments**
- 3 Create an owner / action / deadline table**
- 4 Draft a concise reply to all**
- 5 Prepare a calendar invitation**

BEFORE SEND

- Recipients
- Names and facts
- Dates and promises
- Tone
- Attachments
- Confidential data

Move from rough notes to polished documents

Exercise: one set of notes → executive brief • customer update • staff announcement • action list

Ask business questions—not just formula questions

Is the data complete and consistent?

What changed—and why might it matter?

Where are the exceptions or unusual values?

How do actual results compare with target?

Which chart communicates the finding best?

Can I reproduce the key calculation?

Guardrail: AI can suggest an analysis; the business owner must verify material figures.

Lab: turn sales data into management insight

1

CHECK

Missing values,
duplicates, types

2

COMPARE

Month, region and
category

3

VISUALIZE

Select and create a
clear chart

4

EXPLAIN

Draft five
management
observations

5

VERIFY

Recalculate three
critical figures

Good analysis distinguishes evidence from interpretation—and correlation from causation.

Build a decision story—not a pile of slides

- Conclusion-led slide titles
- One message per slide
- Evidence for every important claim
- Speaker notes for delivery
- Brand and accessibility checks

Convert an overloaded list into a realistic week

AI proposes the schedule. You decide what deserves your time.

Reusable prompt: weekly planning coach

Act as my business productivity coach. Using my goals, deadlines, meetings and available hours, create a realistic weekly plan. Separate fixed commitments from flexible tasks. Include three priorities, daily time blocks, preparation and follow-up time, and 15% contingency. Identify conflicts and tasks to delegate. Ask questions where important information is missing.

INPUTS TO PROVIDE

Goals • deadlines • meetings • working hours • energy constraints • delegation options

Use AI across the meeting lifecycle

Recording or transcribing? Obtain consent and follow organizational privacy rules.

Apply AI where work actually happens

LEADERS

Briefings • options • communication

HR

Training • surveys • job drafts

SALES

Preparation • proposals • feedback

FINANCE

Variance • controls • scenarios

OPERATIONS

Plans • risks • procedures

High-impact employment, financial, legal and customer decisions remain human decisions.

A simple rule before every prompt

Is both the information and the AI system approved by my organization?

PROTECT

Personal, customer, employee and confidential data

VERIFY

Facts, sources, calculations and quotations

CONTROL

Human approval for material actions

DOCUMENT

Inputs, outputs and decisions when required

The nine-point verification check

Names, dates and figures

Source-bound—not invented

Important omissions

Audience and tone

Confidential information

Company policy

Bias or unfair impact

Expert approval needed

I accept responsibility

Redesign one real business workflow

Examples: management reporting • customer inquiries • meeting follow-up • onboarding • project status

Assess judgment—not prompt memorization

Knowledge checks

15%

10%

Email

10%

Weekly planning

10%

Documents

10%

Responsible AI

10%

Spreadsheet

15%

Capstone

20%

Rubric: usefulness • accuracy • verification • communication • safety

Give participants tools they can reuse Monday morning

01 Participant workbook

02 CRAFT prompt card

03 50-100 prompt library

04 Email prompt pack

05 Excel analysis pack

06 Document & slide pack

07 Weekly plan template

08 Meeting templates

09 Verification checklist

10 Data decision guide

11 Responsible AI policy

12 Fictional practice files

One fictional company can connect every exercise into a coherent business story.

Make the learning stick after the course

01 BASELINE

Measure speed, quality and confidence before training

02 PRACTISE

Use fictional, realistic files and show AI failures

03 ADOPT

Apply one workflow in the participant's real role

04 REVIEW

Return after 30 days to measure impact and risk

Keep the workflow lessons stable; update short tool demonstrations as products change.
